Michael Lewis's new book is a chilling indictment of the Trump administration

Michael Lewis's new book, *The Fifth Risk*, is a chilling indictment of the Trump administration. Lewis argues that the Trump administration is a threat to democracy and that its policies are putting the country at risk.

Lewis's book is based on interviews with dozens of current and former government officials. He paints a picture of an administration that is chaotic, incompetent, and ideologically driven. Lewis argues that the Trump administration is not prepared to handle the challenges facing the country, and that its policies are making the country less safe and secure.

One of the most alarming things about the Trump administration, according to Lewis, is its disdain for science and expertise. Lewis writes that the

Trump administration has appointed unqualified people to key positions in government, and that these people are making decisions based on ideology rather than evidence.

Lewis also argues that the Trump administration is undermining the institutions of democracy. He writes that the Trump administration has attacked the media, the judiciary, and the intelligence community. Lewis argues that these attacks are designed to weaken the institutions that hold the government accountable.

The Fifth Risk is a powerful and disturbing book. It is a must-read for anyone who is concerned about the future of democracy in the United States.

The second part, "The Agencies," examines the Trump administration's policies and their impact on the agencies that are responsible for protecting the country.

The third part, "The Resistance," describes the efforts of government officials and others to resist the Trump administration's policies. Lewis argues that the resistance is essential to protect democracy in the United States.
